

SKATE & CREATE

"Professor" Paul Schmitt's decks have come a long way since he first started crafting them in high school woodshop. In fact, he currently makes the boards behind some of your favorite companies, including Black Label, Alien Workshop, and Popwar. And with his new educational program **Create A Skate**, you too can learn how to manufacture a board—all the way from planting a hard-rock maple seed in the soil. To get your own high school woodshop involved, click on over to www.createaskate.org.
